*Redefining Philippine construction through **sustainability, innovation** and **resilience** — centered on people's **well-being.***

HOW WE MAKE A DIFFERENCE

An Overview

Heritage Rooted.
Innovation Driven.
Future Ready.

F+D Construction stands at the convergence of design, strategy, and cultural ecology — a Philippine design-build firm shaping spaces that honor cultural identity while meeting future-adaptive standards.

We remain committed to closing the gap between global benchmarks and local practice by integrating strategic feasibility, regenerative design, and Filipino craftsmanship into one cohesive process. This approach results in environments that are sustainable, technically sound, emotionally resonant, and harmonious with the evolving needs of communities and the contexts they inhabit.

Our work is anchored in ecological responsibility and resource intelligence — design and construction methods that nurture both land and its inhabitants. Every project becomes an act of stewardship: intentional, adaptive, and forward-thinking.

Guiding Principles

Our Foundational Ethos

These principles anchor our decisions, our collaborations, and the way we create spaces that breathe with their surroundings.

MISSION

To elevate Philippine construction by uniting strategic clarity, indigenous wisdom, modern technology, and human-centered design — delivering culturally anchored environments that inspire and endure across generations.

VISION

A Philippines where every built environment reflects innovation, cultural integrity, and regenerative design — shaping communities that are resilient, equitable, and ecologically aligned.

Our Commitments

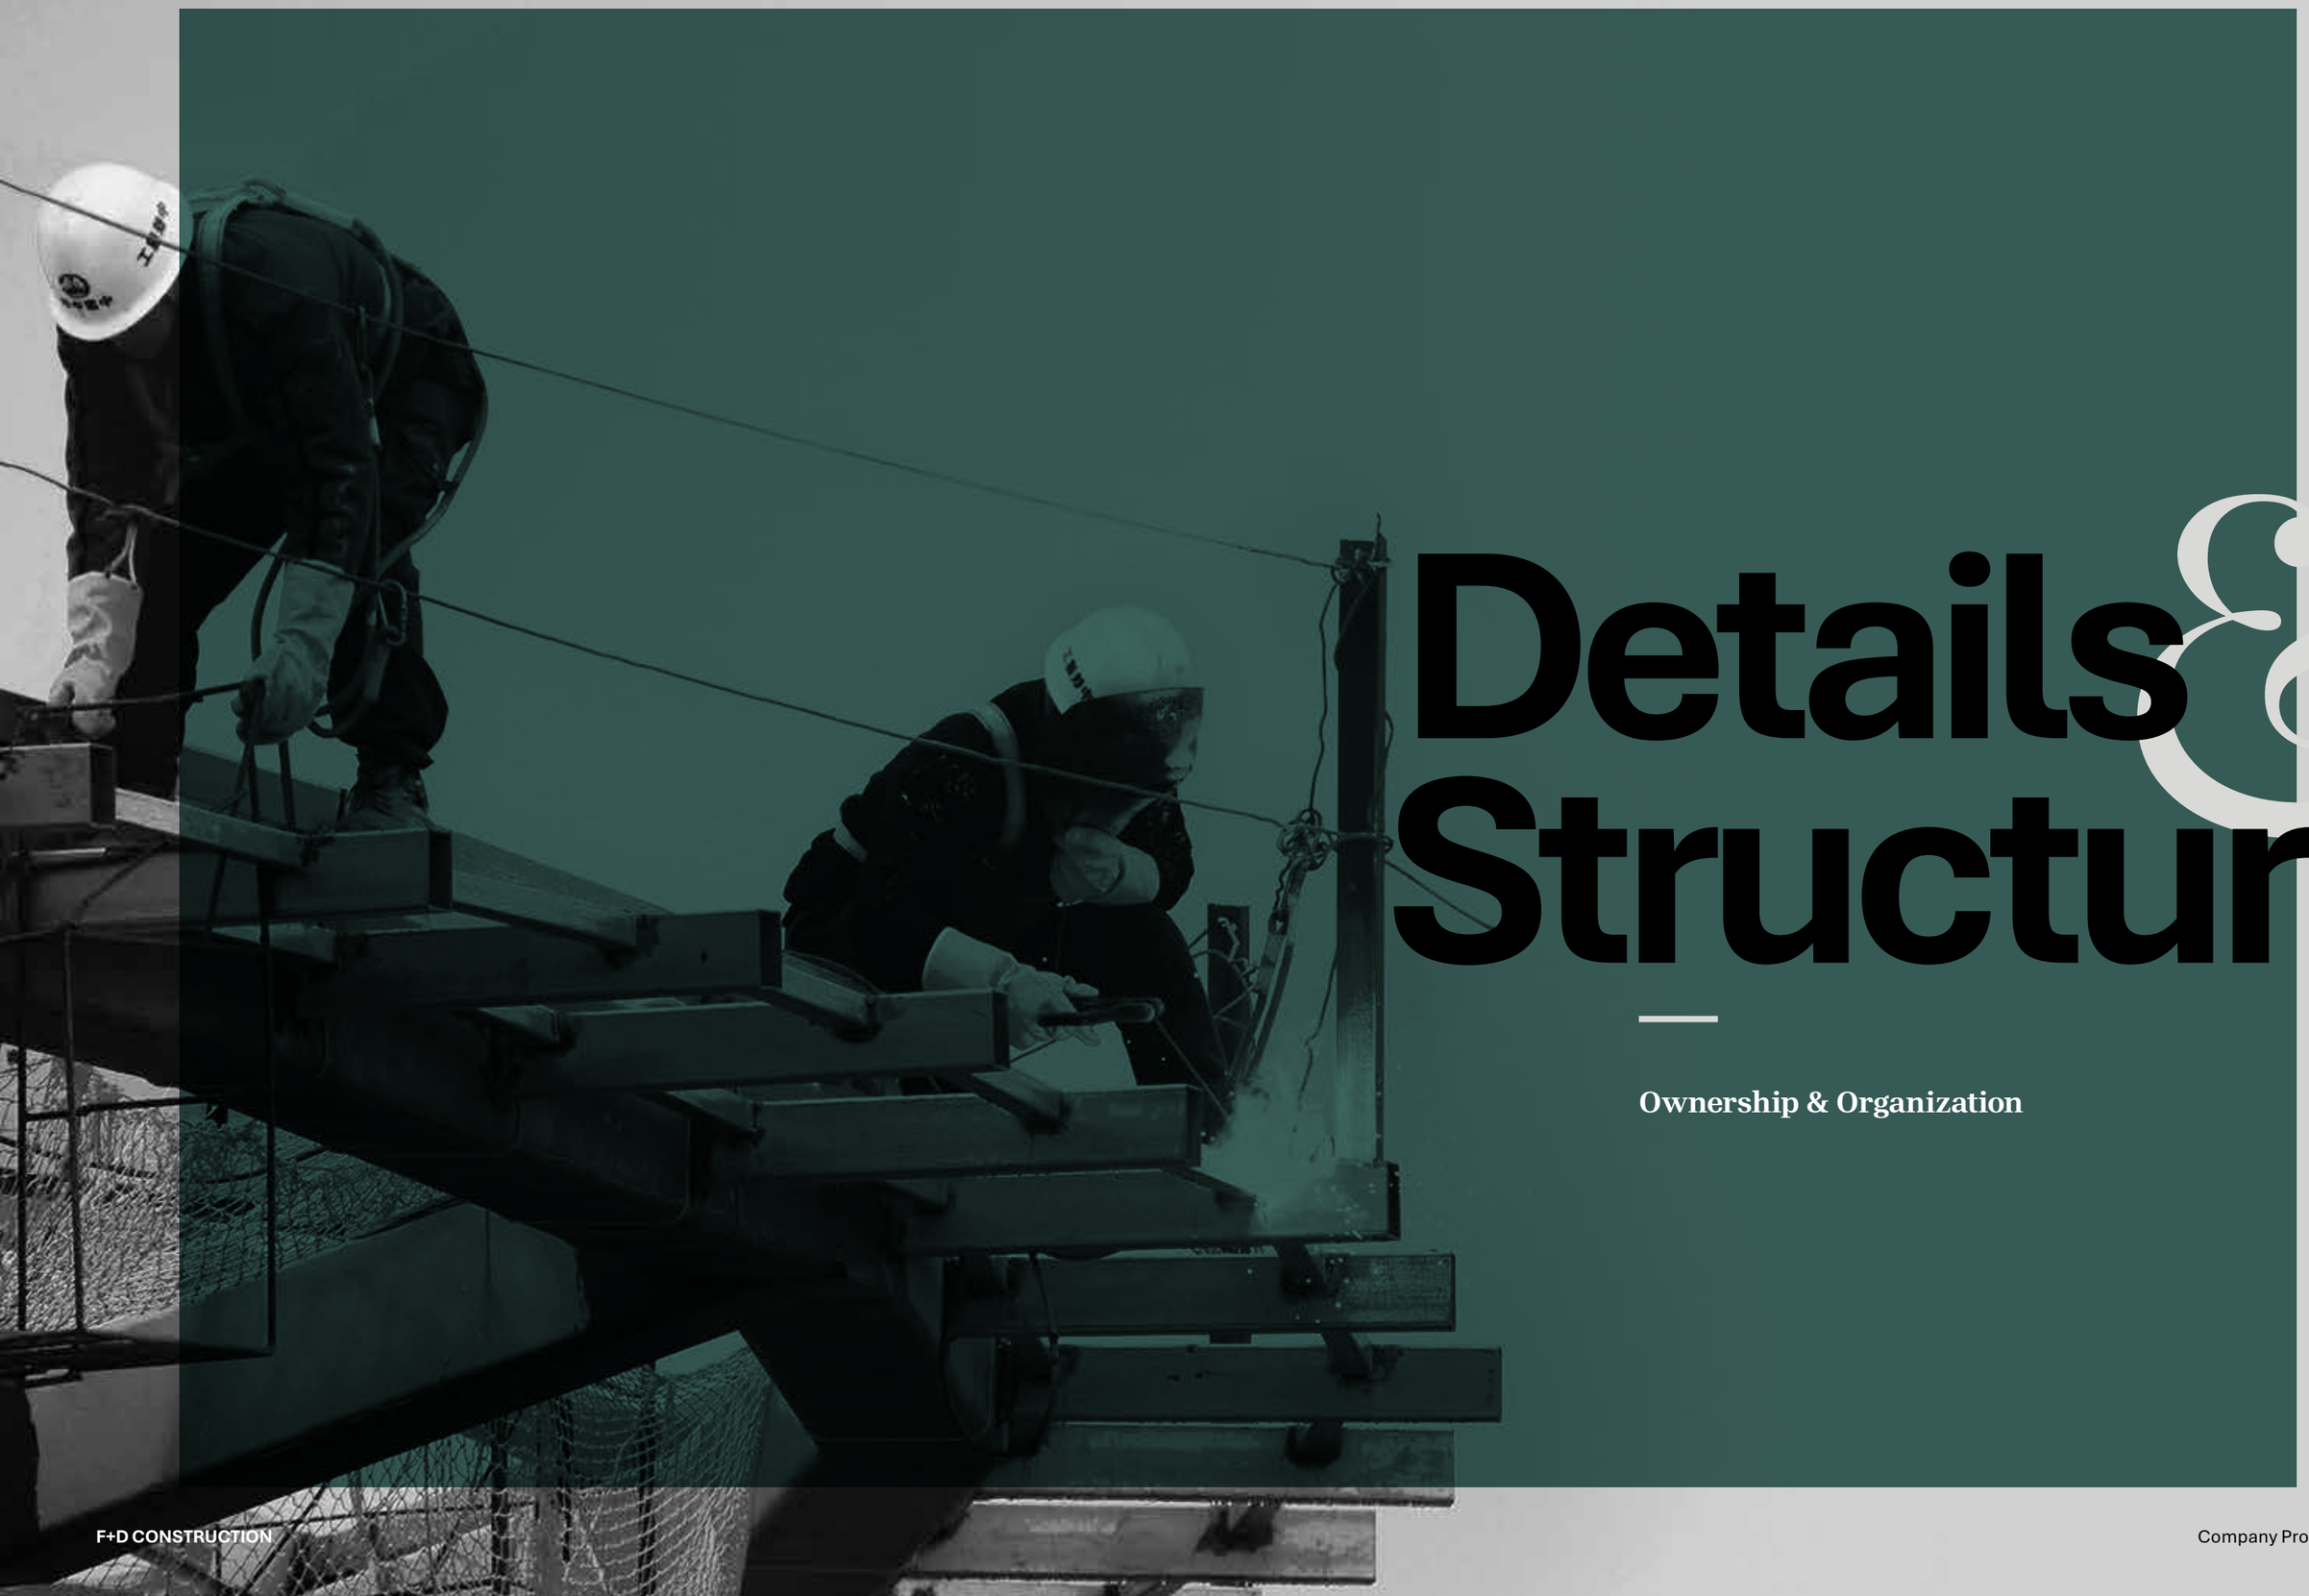

FOUNDATIONAL STANDARD.
Sustainability is ecological responsibility — built on intelligent systems, mindful materials, and continuing stewardship.

PEOPLE FIRST.
Design that nurtures well-being, strengthens connection, and enhances daily life.

UNCOMPROMISING SAFETY.
A safety-first culture where everyone — from workforce to client — is cared for and protected.

INTEGRITY IN PRACTICE.
Transparent processes, ethical choices, and partnerships built on mutual respect.

INNOVATION WITH ROOTS.
Future-forward solutions grounded in place, culture, and context — merging global insight with Filipino ingenuity.

The Founder —

Merging Ancient Wisdom with Modern Precision

Irish Fajilagot stands at the intersection of strategy, cultural intelligence, and operational discipline.

For more than two decades, she has worked inside the world's most demanding industries — oil and gas, aerospace, and construction. These are domains where decisions carry uncompromising implications and clarity is non-negotiable. In these arenas, she has cultivated her reputation on precision, integrity, and composed authority under pressure.

> **"Great design does more than shelter — it nurtures, restores, and connects."**

F+D CONSTRUCTION

Her experience spans robotics integration, advanced safety and detection systems, and specialized operational methodologies for complex industrial environments. Across ExxonMobil, Honeywell, and other prominent global organizations, she spearheaded high-performance teams with rigor, measurable efficiency, and steadfast ethical standards.

Under her leadership, **F+D Construction** has delivered projects exceeding **$650,000.00**, consistently achieving measurable impact, client trust, and operational precision.

Today, Irish leads the company as Chief Executive Officer and Chief Strategist. She defines the What and the Why behind every venture — grounding feasibility, governance design, risk clarity, and long-arc impact in disciplined analysis and cultural context. Her leadership anchors F+D Construction's commitment to biophilic principles, systems resilience, and regenerative development.

"Every project Irish leads carries her signature philosophy: disciplined integrity in service of human well-being, ecological balance, and future-proof development."

F+D Construction was founded on a conviction that the Philippines can rise to global construction standards through disciplined, integrated best practices. Irish brings together modern engineering discipline with insights drawn from Asia's ancestral wisdom, shaping a philosophy where progress strengthens both people and ecosystems. The firm applies these principles to create energy-efficient, community-conscious, and environmentally restorative solutions built for long-term value.

This work extends to Talun Banwa, a flagship feasibility initiative in Coron, Palawan. Focused on cultural preservation, livelihood creation, risk mitigation, and community-centered planning, it represents F+D Construction's highest model of feasibility thinking: multidimensional, data-driven, culturally rooted, and designed for generational outcomes.

The Core Team

Diverse Collaboration. **One Collective Purpose.**

Two **leaders** from different worlds, working **in one rhythm.**

IRISH —
The What and the Why

The driver of strategic horizon that brings strategic depth, decisive leadership, and a sharp command of high-stakes operations.

LAWRENCE —
The How and the When

The engineer of pathways that brings systems thinking, design logic, and the discipline that turns vision into functioning reality.

Their partnership thrives not in similarity, but in contrast. They do not soften their differences; they weaponize them. Strategic pressure meets structural order. Vision meets architecture. Urgency meets stability.

“This is where friction becomes innovation — where decisions are sharpened, assumptions are challenged, and complex problems are dismantled with precision.”

Together, they cultivate an executive structure built on accountability, cultural intelligence, and regenerative intent. Every project moves with purpose. Every process is designed for resilience. Every outcome is shaped by the dual force of direction and discipline.

Strategic Visionary
Operational Commander
Regeneration Lead

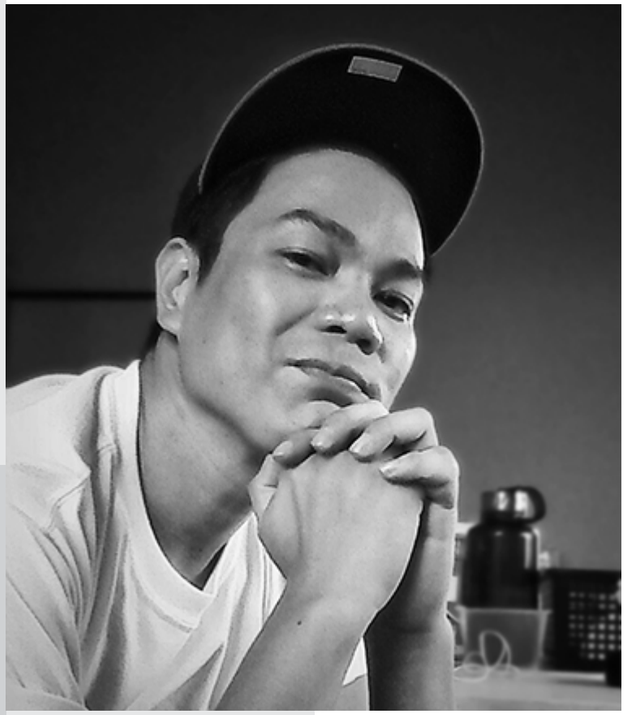

IRISH FAJILAGOT

Chief Executive Officer & Chief Strategist

Irish leads with a strategist's clarity and a commander's discipline. Her strength lies in making decisive, high-impact choices rooted in feasibility, governance design, and long-arc outcomes.

Her background in high-risk industrial sectors forged her into a leader who moves with calm authority — delivering precision, ethical judgment, and measurable results across diverse operational environments.

At F+D Construction, she defines the direction: the strategic intent, the feasibility model, the cultural intelligence behind every venture. Her guidance ensures that decisions are grounded in context, shaped by rigorous analysis, and aligned with long-lasting resilience.

Strategic Architect
Creative Synthesis
Thought Leadership

LAWRENCE DIONISIO

Chief Operating Officer & Delivery Director

Lawrence transforms complexity into structure. His craft lies in system architecture, design intelligence, and the discipline to turn abstract vision into operational reality.

He leads with steady influence — a calm, methodical force in high-stakes environments. His work clarifies pathways and ensures resilient, coherent execution aligned with F+D's regenerative mission.

At FD Construction, he defines the method: translating strategy into precision-built processes, delivering solutions that hold under pressure, and ensuring every project is executed with structural integrity and sustained value.

PHILOSOPHY
&APPROACH

The Framework

—

Designing with Purpose.
Building with Responsibility.

REGENERATIVE DESIGN & CONSTRUCTION

At F+D Construction, we design with intention and build with care.

Our work is guided by a regenerative mindset — one that reconnects people with their surroundings and restores the natural systems that support life. We anchor every project on ecological sensitivity, cultural awareness, and human comfort, creating structures that feel grounded, purposeful, and alive.

We apply biophilic and human-centric design with discipline, prioritizing natural light, breathable spaces, responsible materials, and low-impact construction. Every structure becomes a quiet statement of respect for people, place, and future.

OUR INTEGRATED APPROACH

Good design emerges from the synergy of collaborative efforts —

Architects, engineers, strategists, and sustainability experts working cohesively from the outset. This integrated process aligns goals, sharpens feasibility, and ensures that projects progress cohesively and with clarity.

From concept development to technical execution, we intricately weave regenerative thinking into every layer. We cultivate environments that enhance human experience and strengthen community resilience.

Key Compet — encies

Project Focused.
Regenerative Solutions.

Our services bring our philosophy to life — translating our values into practical, sustainable and resilient solutions that enhance life and protect the environment.

INTEGRATED FEASIBILITY & SYSTEMS RESILIENCE

De-risking vision. Engineering certainty. Architecting adaptive, future-ready systems.

We deliver executive-level strategic analysis, governance modeling, and multi-sector feasibility assessments that remove ambiguity, sharpen decision-making, and ensure capital investment transforms into measurable, regenerative outcomes.

This is where every project begins — with disciplined clarity, resilient systems design, and a roadmap built to endure.

EXPERIENCE-CENTERED & HOSPITALITY CONSTRUCTION

Signature-build environments designed for connection, comfort, and cultural resonance.

We create hotels, resorts, restaurants, and commercial experience spaces that merge beauty with biophilic discipline. Every structure is crafted to enhance human experience, elevate brand identity, and operate with environmental intelligence.

This is our specialty vertical — where form, function, and feeling converge.

GREEN CONSTRUCTION & ECO-EFFICIENT NEW BUILDS

Future-ready structures built on function, ecological responsibility, and habitability.

We partner with clients to design and construct eco-efficient buildings that reduce environmental impact, optimize energy performance, and integrate regenerative principles at every stage.

This is our commitment to building new spaces that honor both people and the planet.

REGENERATIVE RETROFITTING & SYSTEMS UPGRADING

Reviving the old. Reinforcing the present. Preparing structures for tomorrow.

We modernize existing buildings through ecological upgrades, energy optimization, structural reconditioning, and resilience-focused improvements.

This is where the past is renewed — transformed into efficient, responsible, future-ready infrastructure.

What We Do Best

A Commitment to **Our Life Mantra**

Our strength lies in delivering a seamless, end-to-end project experience — from technical planning and material sourcing to construction management and final finishing — ensuring a single point of accountability from foundation to completion.

FOUNDATION TO FINISH

Comprehensive oversight from concept development to final project turnover.

COMPREHENSIVE RENOVATIONS

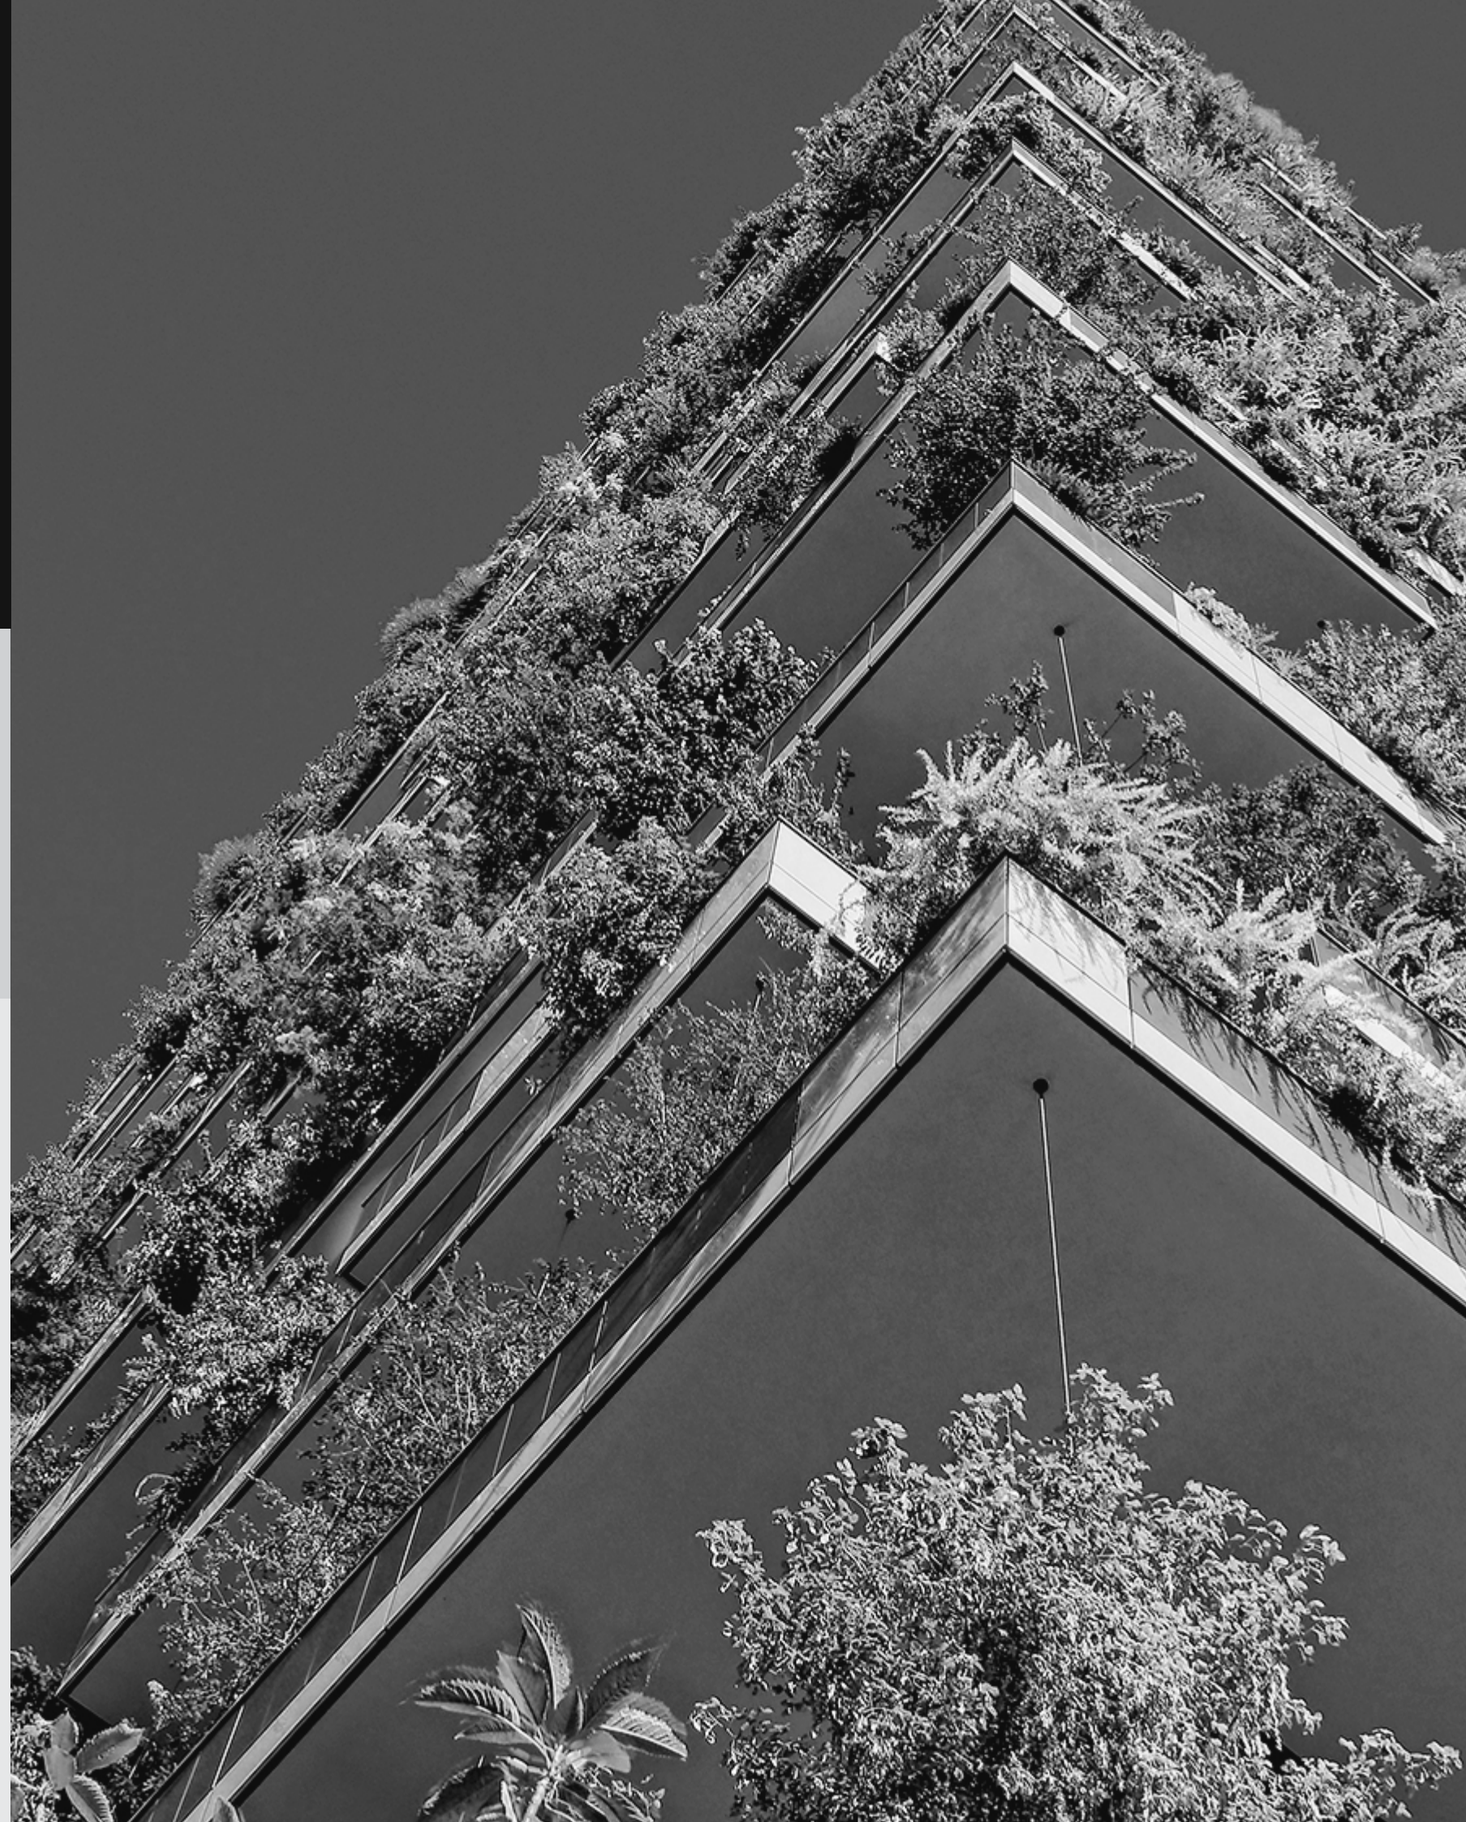

Interior and exterior refurbishments executed with precision to meet every project requirements.

EXPERT PROJECT DELIVERY

Coordinated execution that honors timeline, budget, and performance standards.

SEAMLESS SOURCING & LOGISTICS

Efficient procurement and material coordination for smooth, reliable project flow.

PORTFOLIO

From eco-retrofitted facilities to human-centric hospitality spaces, our work reflects our belief that resilient construction provides a holistic solution that benefits both the environment and human well-being towards a sustainable future.

Spaces of Well-Being

Biophilic Design, Luxury, Health, Emotive Language and Human-Centric Outcomes.

A portfolio expressing the Lunti Philosophy through regenerative design and refined craft, creating environments that elevate health, comfort, and the human spirit.

WELLNESS DINING ARCHITECTURE & ADAPTIVE RE-USE

Transforming existing facilities into culinary sanctuaries shaped by adaptive reuse, natural light, and sensory harmony. The result is a dining experience that reconnects people with place.

PROJECTS—

Souffle De Vie 38
The Upperdeck Kitchen 40

INTEGRATED SOCIAL & AQUATIC ARCHITECTURE

A breathable social hub that blends recreation, function rooms, and alfresco dining. It cultivates community wellness in seamless dialogue with the surrounding landscape.

PROJECT—

The Upperdeck 42

RESIDENTIAL LIFECYCLE REJUVENATION

Sustainable retrofitting that renews energy performance, structural resilience, and lifelong beauty. These upgrades ensure the home evolves gracefully with its occupants.

PROJECTS—

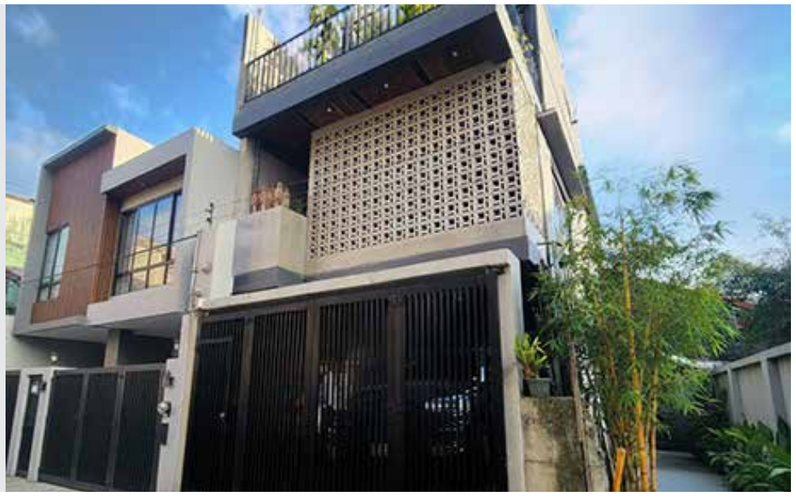

Bungalow Renovation 46
Residential Finishing 48

VERTICAL HABITAT DESIGN + BUILD

A dual-level home shaped by green infrastructure, passive cooling, and upcycled materials. It proves that vertical living can stay open, grounded, and alive.

PROJECT—

Split-Level Residential 44

BRANDED EXPERIENCE ENVIRONMENTS

Designing commercial spaces that create emotional resonance with the product. Strategic planning ensures intuitive, human-centered flow that enhances the customer experience.

Operational Stewardship

Industrial Efficiency, Technical Language, Circular Economy, Asset Longevity and Safety.

Projects built on industrial rigor, lean principles, and a Zero-Incident Safety Culture. These standards ensure civil works, logistics, and maintenance support enduring sustainability.

BUILDING ENVELOPE & FUNCTIONAL RESTORATION

Restoring the building shell and core systems through targeted roof repairs, daylighting improvements, and utility upgrades. This approach elevates energy performance and prevents costly failures.

PROJECT—

Scrapyard Skylight 56
Ridge Roll Rehabilitation 58
QC CR Renovation 60

INDUSTRIAL ASSET PROTECTION & STRUCTURAL REHABILITATION

Preserving industrial assets through disciplined execution, ensuring functional longevity. Structural components, fire systems, and perimeters are reinforced to withstand wear and operational stress.

PROJECT—

North Wing & Fire Water Line Restoration 62
Fence & Gate Repainting 64

UTILITY INFRASTRUCTURE ENGINEERING

Engineering resilient, precision-built foundations for essential utilities. Each structure is designed to ensure maximum stability and reliable system performance.

PROJECT—

CW Concrete Bed 66

RENEWABLE SYSTEM INTEGRATION INFRASTRUCTURE

Developing frameworks and secure enclosures that support solar and electrical systems. These installations protect the equipment that powers a sustainable future.

PROJECT—

Cable Tray Bridge 68
Solar Inverter House 70

CARBON-MINIMIZED ECO-LOGISTICS & RESOURCE STEWARDSHIP

Logistic solutions focused on sustainable material sourcing and responsible debris management, reducing carbon impact.

PROJECT—

Material Sourcing 72
Hauling & Trucking 74

CIRCULAR MATERIAL PROCUREMENT

Support for the circular economy: supplying essential aggregates and repurposing construction debris. This process minimizes landfill waste and raw material extraction demand.

GLY DEVELOPMENT CORPORATION

NOTICE OF AWARD

January 21, 2021

F + D CONSTRUCTION
343 AC REYES ST. POBLACION,
PLARIDEL, BULACAN

Dear Sir/ Maam,

We are pleased to inform you that **F + D CONSTRUCTION** has been awarded to provide GLY DEVELOPMENT CORPORATION the following services:

Supply of Broken Concrete as needed and approved by GLY (PHP 220.00/cbm)

GLY Development Corporation has the right to suspend deliveries anytime with notice to suppliers should they deem fit; As well as to reject deliveries that does not conform with acceptable quality as agreed between Parties.

If you have any questions, please feel free to contact us.

Sincerely,

ZAIRELL SENOBIN

Testimonials

EVERY GREAT SUCCESS IS A DIRECT REFLECTION OF THE INCREDIBLE RELATIONSHIPS WE BUILD.

We are proud to work alongside our valued clients and industry-leading partners to achieve common goals with meaningful impact. These stories highlight our shared journey of collaboration, creative thinking, and favorable outcome that define who we are today. Read what they have to say and discover how we turn challenges into success stories.

FD Construction exceeded our expectations, largely thanks to Irish's unwavering on-site supervision, ensuring the project met our high-quality standards while prioritizing safety and firmly adhering to The Farm at San Benito's protocols. Despite tight deadlines, they worked with professionalism to deliver projects on time. What's more, their competitive pricing offered remarkable value without compromising workmanship.

Binod Chaudhary

Chairman

CG CORP. GLOBAL

Charina Buscaino-Javier
PRINCIPAL ARCHITECT

“As the Principal Architect of the project at the Farm at San Benito, I was surprised by F+D Construction’s competence. Irish and her invaluable team demonstrated a meticulous attention to detail that truly exceeds my expectations. Despite severe time constraints, they flawlessly executed the plans and delivered a truly classy result, right on schedule.”

GREEN ADP+AA Skala Architects

Meinrad D. Cruz
DEPARTMENT MANAGER

“I have worked with F+D Construction OPC on numerous projects at Asian Transmission. As a multinational establishment, we enforce safety and security protocols for all personnel on site. This group fully understands and aligns with these principles, executing every project efficiently, adhering to both the allotted budget and required deliverable schedules.”

Heat Treatment Department Asian Transmission Corporation

LUNTI
CENTERED ON LIFE

Rooted in the Filipino word for **green**, Lunti reflects our connection to nature, culture, and the places we call home. It reminds us that building responsibly means designing with people, climate, and context in mind.

For us, Lunti stands for spaces that breathe — open, grounded, alive with movement. It means honoring airflow, natural light, and materials that respect the ecosystem.

But more than that, Lunti is a set of pillars that guides every purposeful decision we make.

“Lunti isn’t just a color — it’s a mindset.”

Ang **Apat** na **Haligi** ng **Lunti**

A Mindset for Purposeful,
Regenerative Design.

The foundational intentions that shape how we deliver meaningful, high-value solutions — every project, every client, every time.

SUSTAINABILITY

We design generational longevity — stewarding the ecosystem, ensuring circular resource use, and optimizing cost efficiency for lasting environmental and financial viability.

INNOVATIVENESS

We approach every constraint — leveraging disruptive creativity, smart technology, and adaptive thinking to achieve unrivaled efficiency and superior technical outcomes.

RESILIENCE

We build systems and structures — engineered to master variability, extremely versatile, highly robust, and upward compatible for climate and economic uncertainty.

HUMAN-CENTRICITY

We craft holistic human experience — prioritizing comfort, intuitive movement, natural light, cultural harmony, and the unique rhythms of life within the communities we serve.

Why It — Matters

LUNTI BRIDGES
Practical Construction & Deeper Purpose.

Every **action** is guided by **method**.
Every **method** is rooted in **insight**.
Every **insight** elevates **human life**.

It **strengthens** our **perspective**:

Ethics (our why).
Knowledge (our how).
Identity (our who).

Ensuring every project becomes more than a structure — it becomes a contribution to life, to community, and to the future.

Build — With Us

BECAUSE FOR US —
To Build Better Is To Build Centered On Life.

Let's **co-create** environments that are **sustainable, resilient, innovative**, and **deeply human**.

Partner — With Us

Reach out today, and let's begin the **conversation**.
